GAME DEVELOPMENT (JAKE'S IDEA)

Someone other than me needs to start to make sure that there is actual effort undertaken into this?

01

BASIC INFORMATION

What will the game be about, main characters, features, gameplay, etc.
(A document will do)

02

FOR WHAT AUDIENCE

Mobile gamers, web, pc ? Teens, adults, children?

03

TECHNICAL SPECIFICS?

Game hosting, how to collaborate (ex: GitHub).
Game engine, programming language, etc.

PROGRESS

What progress have we made since last week?

01

DISCORD BOT

Have you started?

02

WEBSITE

Have you started?

POSSIBLE MINECRAFT SERVER?

Probably anarchal minecraft server...

SERVER SPECS

- 4 cores (ARM-based)
- 24 GB RAM
- 100 GB of storage
- Use folia (use as much cores as possible to avoid performance issues)

HOW TO GET MEMBERS?

- Make it available to all Largo High School Students (not just IB)
- 24/7
- Keep world border big enough but small enough so players don't go out too far.

ONLY RULES

- No attempting to crash the server
- Hacks and greifing allowed
- No liability for damages

CONCLUSION AND KEY TAKEAWAYS

See you guys next Thursday!
